957 010. X-ray Calibration tool

produces Grey scale calibration for inspection of Falcon 10 Wing root flanges.

AS-301 BRAKE

BLEEDER KIT

The AS-301 Brake bleeder Kit consists of a combination of high pressure hose, pressure gage and needle valve. These components are combined to simplify the process of bleeding, troubleshooting and verifying the function of the Falcon brake system. As with all of Aviation Technical Solutions products, the AS-301 is supplied in a rugged box for convenient storage or shipping.
